**Midwest Ingredients rapid ten-year growth leads to expansions and an online presence**

**Princeville, Illinois** –Midwest Ingredients provides an efficient system for distributing a wide variety of distress food, feed, and byproducts throughout the continental United States and Canada.

Over the last 10 years, Midwest Ingredients has worked closely with over 6000 customers. Their strong presence in the feed industry has presented many exciting changes and growth to the business. The launch of the new corporate website and an increase in staff are only two of the beneficial changes that have occurred.

Ruthi Coats, President of Midwest Ingredients states, “At Midwest Ingredients, our number one priority is customer satisfaction. We feel that the new addition to our team (Paul Plymall) will add yet another professional leader to assist our customers. As for our new corporate website launch, with the evolution of e-commerce in the agriculture industry, it was time to make the jump to provide even better service, information and awareness to our existing and potential customers.”

Areas of interest on the newly developed site include an insight into feed analysis, corporate information about Midwest Ingredients, agriculture links, product information, and most of all, a special offer; 100% customer satisfaction. Midwest Ingredient can also give the customer an in-depth background on products such as analysis or equations of rations.

“It all began when two entrepreneurs decided to make their mark in the feed industry. They implemented their goal and vision of offering a high level of customer service along with the vow to never trade improperly. This is an exciting time for Midwest Ingredients; to see the increase in business over the last 10 years is amazing, and I look forward to more enhancements in the future,” states La Lette Debord, Vice President of Midwest Ingredients.

The Midwest Ingredients web site, [www.midwestingredients.com](http://www.midwestingredients.com) provides company information, as well as content beneficial to individuals and companies in the agriculture food and feed industry.
